

AVRI ENERGY PRIVATE LIMITED

Powering industry, utilities and **infrastructure** across India.

Turnkey HT & LT works, substations, transformers, smart metering, solar and EV charging infrastructure — engineered, built and maintained by one accountable team.

Reliable Power. Trusted Partner.

CLIENT SATISFACTION

WHO WE ARE

An engineering-led electrical EPC and renewable energy company

Avri Energy began as an electrical contracting outfit serving the industrial belt around Modinagar and Ghaziabad. Our first customers were plant owners tired of tripping panels, overheating cables, and contractors who disappeared after the final payment.

We grew by doing the unglamorous things properly — correct cable sizing, honest earthing, protection settings that were genuinely calculated, and a phone that gets answered when something fails at two in the morning. Word travelled, and so did we: from wiring and panels into transformers, substations, automation and, as the economics turned, into solar and EV infrastructure.

Today we deliver turnkey EPC packages for utilities, government departments, industry and infrastructure developers. The engineering discipline has not changed — only the size of the systems it is applied to.

OUR MISSION

Make dependable power ordinary

Deliver electrical and renewable energy systems that are correctly engineered, properly installed and genuinely supported — so our clients can stop thinking about their power supply.

OUR VISION

India's most trusted energy partner

To be the first call for electrical infrastructure across the regions we serve, and to move a meaningful share of that demand onto clean, self-generated energy.

BY THE NUMBERS

80,000+

Smart meters installed

50+

Projects completed

10+

99%

Client satisfaction

"Reliable Power. Trusted Partner." is not a slogan we picked for a logo. It is the only thing our clients actually buy from us.

AT A GLANCE

Legal name · Avri Energy Private Limited

Established · 2015

Headquarters · Modinagar, Ghaziabad, U.P.

Core region · Delhi NCR & West Uttar Pradesh

Reach · Pan-India for EPC contracts

Sectors · Utilities, Government, Industry, Infra

IN-HOUSE CAPABILITY

- In-house design & drafting team
- Directly employed installation crews
- Panel assembly & pre-dispatch testing
- Calibrated test instruments & thermography
- Utility liaison & statutory approvals
- Post-commissioning service desk

Fourteen service lines, one accountable contract

From detailed engineering and procurement through construction, testing and statutory clearance — to the maintenance contract that keeps the asset performing afterwards.

01

Electrical EPC & Turnkey Projects

Single-point responsibility for engineering, procurement and construction of complete electrical systems.

02

HT & LT Electrical Works

High- and low-tension distribution networks built to IS, CEA and utility standards.

03

Substations

Indoor and outdoor substations from 11 kV up to 220 kV, built turnkey.

04

Transformers

Supply, erection, testing, overhaul and maintenance of distribution and power transformers.

05

Smart Metering Solutions

Smart and prepaid metering roll-outs with communication, integration and data validation.

06

Energy Management

Audits, monitoring and correction that turn energy data into a lower bill.

07

Solar Solutions

Rooftop and ground-mount solar plants, delivered turnkey with net metering and O&M.

08

Electrical Automation

PLC, SCADA and control systems that make plants observable and repeatable.

09

Operation & Maintenance

Planned maintenance and rapid response that protect uptime and asset life.

10

Industrial & Commercial Works

Complete internal electrification for factories, warehouses and commercial buildings.

11

Street Lighting

LED and solar street lighting projects, from photometric design to centralised control.

12

EV Charging Infrastructure

AC and DC charging stations with the upstream power infrastructure they need.

13

Supply of Electrical Equipment

Material supply from approved makes against your BOQ, with full test documentation.

14

Statutory Liaison & Approvals

DISCOM applications, net metering, inspections and handover dossiers managed end to end.

TALK TO US

Tell us the load, the site and the date.

We will come back with a costed scope, a drawing set and a programme you can hold us to.
sales@avrienergy.com · +91 89790 94813

Equipment from approved makes, with test documentation

Item-wise supply against your BOQ — correctly rated, genuinely sourced and delivered with certificates. Available on a material-only basis or as part of a turnkey package.

Transformers

- Oil-immersed distribution transformers, 25 kVA – 2500 kVA
- Cast-resin dry-type transformers
- Power transformers up to 220 kV

Panels & Switchgear

- HT metal-clad switchgear panels & metering cubicles
- LT PCC, MCC and APFC panels
- SF6 ring main units (RMU)
- Indoor VCB panels & outdoor pole-mounted VCB
- ACB, MCCB and MCB protection range
- Sandwich bus ducts
- LT distribution & feeder pillar boxes

Metering & Instrument Transformers

- Single and three-phase smart meters
- Three-phase CT-operated smart meters
- DT (distribution transformer) meters
- LTCT energy meters
- Current & potential transformers (CT/PT)

Cables & Accessories

- HT XLPE power cable
- LT XLPE & PVC power cable
- Control & instrumentation cable
- Aerial bunched (AB) cable
- Jointing kits & terminations
- Installation accessories & junction boxes

Lighting, Poles, Solar & EV

- Galvanised street light poles & high-mast lighting
- LED street light luminaires
- Solar modules, inverters and mounting structures
- EV charging stations, AC and DC
- Earthing materials and insulators

Supplied the right way

- Approved and tested makes only
- Ratings verified against your load calculations
- Routine and type test certificates with every despatch
- Pre-dispatch inspection on request
- GST-compliant billing for institutional buyers

Send us your BOQ at sales@avrienergy.com and we will quote item-wise.

Thirteen sectors, each with its own rules

A utility inspection regime, a CPWD schedule and a hospital's essential-supply segregation are not the same problem. We work to the standard the sector actually uses.

Power Utilities

- › Substation erection & augmentation
- › Feeder bifurcation, network strengthening
- › AT&C loss reduction programmes

DISCOMs

- › Smart & prepaid metering roll-outs
- › LT augmentation and re-conductoring
- › Consumer indexing and GIS survey

Government Departments

- › Departmental electrical works
- › Compliance-ready documentation
- › Standard tender conditions

CPWD

- › Internal electrification of buildings
- › External services & street lighting
- › To CPWD schedule and specification

Renewable Energy

- › Rooftop & ground-mount solar EPC
- › Evacuation lines, pooling substations
- › Long-term plant O&M

Industries

- › Captive substations, plant distribution
- › MCC, PCC and process automation
- › Energy audits, power factor correction

Commercial Buildings

- › Complete building electrification
- › Standby power and UPS systems
- › Lighting design, energy management

Residential Projects

- › Township & society electrification
- › Substations, DG backup, lift power
- › Common-area lighting and metering

Infrastructure Projects

- › Highway and tunnel lighting
- › Metro electrical packages
- › Utility shifting, power distribution

Railways

- › Station electrification, platform lighting
- › Auxiliary substations and feeders
- › Supply for signalling & telecom rooms

Airports

- › Terminal electrification and lighting
- › Standby power, UPS, load segregation
- › Airside and apron distribution

Hospitals

- › Essential / non-essential segregation
- › DG backup, UPS, medical-grade earthing
- › OT and ICU power distribution

Smart Cities

Smart lighting, metering and connected infrastructure for urban modernisation programmes.

- › Centralised smart street lighting
- › Smart metering and command-centre integration
- › EV charging and public infrastructure

Not on the list?

If it carries current, we have probably built it. Send us the drawings or the tender document and we will tell you honestly whether we are the right contractor for it.

SELECTED PROJECTS

Delivered, energised and still running

SUBSTATIONS

33/11 kV Substation — Industrial Area

STATE DISTRIBUTION UTILITY · GHAZIABAD, U.P. · 2024

Turnkey erection of a 33/11 kV substation including switchyard, protection panels, transformer erection and charging.

2 × 5 MVA **33/11 kV** **7 months**
CAPACITY VOLTAGE DURATION

SOLAR SOLUTIONS

1.2 MW Rooftop Solar Plant

AUTO COMPONENTS MANUFACTURER · MEERUT, U.P. · 2024

Design, supply and installation of a captive rooftop solar plant with net metering and a five-year O&M contract.

1.2 MWp **1.7 GWh** **4 months**
CAPACITY ANNUAL YIELD DURATION

SMART METERING

Smart Metering Roll-out

DISTRIBUTION COMPANY · WEST UTTAR PRADESH · 2023

Survey, installation and HES integration of smart meters across residential and commercial consumers.

18,000+ **HES / MDM** **11 months**
METERS INTEGRATION DURATION

STREET LIGHTING

Municipal LED Street Lighting

MUNICIPAL CORPORATION · MODINAGAR, U.P. · 2023

Retrofit of conventional street lighting to LED with feeder pillars and centralised control and monitoring.

6,400 **58%** **6 months**
LUMINAIRES ENERGY SAVED DURATION

HT & LT WORKS

HT & LT Network — Warehousing Park

LOGISTICS DEVELOPER · HAPUR, U.P. · 2023

Complete HT ring main, LT distribution and internal electrification across eight warehouse blocks.

4.5 MW **22 km** **9 months**
CONNECTED LOAD CABLING DURATION

EV CHARGING

Highway EV Charging Hub

MOBILITY OPERATOR · NH-58 CORRIDOR · 2024

Power infrastructure and installation of DC fast and AC charging points, including transformer and panel works.

12 points **600 kW** **5 months**
CHARGERS CAPACITY DURATION

AUTOMATION

Plant Automation Upgrade

PROCESS INDUSTRY · GHAZIABAD, U.P. · 2022

PLC and SCADA upgrade with new MCC panels, VFD integration and operator HMI stations.

14 MCC **900+** **5 months**
PANELS I/O POINTS DURATION

COMMERCIAL WORKS

Institutional Campus Electrification

EDUCATIONAL INSTITUTION · MUZAFFARNAGAR, U.P. · 2022

Internal and external electrification of an academic campus with substation, DG backup and campus lighting.

3.2 lakh **1.6 MVA** **10 months**
BUILT-UP SUBSTATION DURATION

HOW WE WORK

Six stages, no surprises

The same disciplined sequence on a ten-lakh contract and a ten-crore one.

01

Consultation & Survey

We visit the site, study the load profile and establish what the installation genuinely needs to do.

02

Engineering & Proposal

Detailed design, BOQ and a transparent commercial proposal with no hidden line items.

03

Procurement

Material sourced from approved makes, inspected and delivered against the project programme.

04

Execution

Construction by our own supervised crews, with weekly progress reporting and safety oversight.

05

Testing & Handover

Pre-commissioning tests, statutory approvals and a complete handover dossier with drawings.

06

Operation & Maintenance

Scheduled preventive maintenance and rapid breakdown response keep the asset performing.

WHY CLIENTS CHOOSE US

Single-Point Accountability

Design, supply, execution and maintenance sit with one team, so nothing falls between vendors.

Engineering Discipline

Every cable size, protection setting and drawing is calculated and justified before it reaches site.

Safety Without Exception

Documented method statements, PPE compliance and trained supervision on every site, every day.

On-Time Delivery

Committed programmes with weekly reporting, so you always know exactly where the project stands.

In-House Capability

Our own design team and installation crews mean your schedule does not depend on somebody else's.

Long-Term Support

We stay after energisation with maintenance contracts, spares and a responsive service desk.

CREDENTIALS

Certified, licensed and compliant

ISO 9001

Quality Management

Documented quality processes across engineering, procurement and execution.

ISO 14001

Environmental Management

Waste, disposal and environmental controls applied on every site.

ISO 45001

Occupational Health & Safety

Method statements, PPE discipline and incident reporting as standard practice.

Class A

Electrical Contractor Licence

Licensed to execute HT and LT electrical works under state regulation.

MSME

Registered Enterprise

Registered under the Government of India MSME framework.

GST

GST Compliant

Fully compliant billing and documentation for institutional buyers.

CLIENTS WE SERVE

State Power Utility

Municipal Corporation

Auto Components Ltd

Logistics Developer

Process Industries

Educational Trust

Mobility Operator

Infra Developers

IN THEIR WORDS

“

They took over a substation package that was already behind schedule and still energised it on the revised date. The documentation at handover was the cleanest we have received.

Project Head

Transmission Projects, State Power Utility

“

Our rooftop plant has run for two summers without an unplanned outage. When a string tripped, their team was on site the same day.

Plant Manager

Manufacturing Operations, Auto Components Ltd

“

What stood out was the honesty during design. They talked us out of an oversized system and saved us a substantial amount of capital.

Director

Facilities & Infrastructure, Educational Trust

GET IN TOUCH

Tell us what needs power. We will tell you how to get it there.

Whether it is a tender document, a single-line diagram or just a load figure on the back of an envelope — send it across and we will come back with a straight answer.
